«Think & Act Globally»

The formation of the fundamental Science 21 (oriented toward the human priority values, planetary strategic thinking, the new - global - paradigm) became one of the main task of the Megaecology Project, which is carried out on the initiative of the **World Survival & 21-st Century Problems Center** International Foundation.

The Project is realized within the limits of our comprehensive program “World 21”. It is based on the fundamental principles of Agenda 21 (UNO, Rio’92) and is aimed to solving the key problem of Planetary Survival, the problem of *Global Education with a Cosmic Vision of Life* (Prof. F. Major, UNESCO, 1989).

The conceptual basis of the Project was developed within the National Competitive project of the Ukrainian Fundamental Research Fund, “*The Working out of the Playing Transmeditative VEDANTA-Method of the Complete Immersion into the Global Informative Environment for the Development of Strategic Thinking and Clairvoyance into Non-Traditional Education and Upbringing*”.

The following development and use of Project ideas will help solve a strategically important problem of mankind, the problem of Training Leaders 21 who will be able to save the Planet from Global Ecological Catastrophe.

The knowledge were discovered for us which allows to see the nature of suicide as well as cancer, heart problems, ulcer and many other permanent diseases of the mankind from entirely new angle.

The results of our researches (which were often done in case of emergency) have been already used by Holy Patriarch of Moscow and the whole Russia Aleksy II (1993), the President of Russia, Mr. B.Yeltsin (1996), the President of the USA, Mr. B. Klinton (1997), members of Japanese Emperor’s family (1997).

Our Know-How opens the door to the Global Secrets of millenniums. It is the key for survival of mankind in a new century.

We are opened for cooperation with everybody who looks into the Future, who agrees with us that acute and urgent problems of the Planet can be solved only by global means, through global thinking, global solutions, global actions, global co-operation and global responsibility of everyone.
