In this paper a logic-information psycho-linguistic phenomenon of the human personality is described. This phenomenon is responsible for crises in people and in the society. Successful technologies for eliminating the consequences of the phenomenon are proposed.

In the construction of complex responsible information-controlling systems in society and in science (presidential or staff structures, missile navigation or atomic plant systems, autonomic robot control systems with artificial intelligence on another planet, life-support systems for superior animals and people, or computer nets) the following problems arise:

- 1) How to protect the kernel of the system from external forces and influence;
- 2) How to protect the received or incoming information from lies and errors;
- 3) How to protect the regeneration or recovery process of affected control systems; etc.

In presidential structures, for example, these protection principles are carried out through the implementation of numerous layers of advisers, ministers, referents, security, etc. There are well known examples of catastrophic consequences of failure of these principles for various systems. The first principle failed and John Kennedy, Ulaf Palme, Indira and Radgiv Gandy died. The second principle failed and N. Khrushchev and M. Gorbachev lost their posts. The third principle failed and the system could not recover after V. Lenin, I. Stalin or N. Khrushchev left. No complex responsible information system can function after the failure of these three protection principles.

The tragic paradox of our civilization is that these three security principles are being violated in the human society. It seems that people live and work normally. However, they pay for it by living in a semi-insane civilization, which is overfilled with crises, wars, crime, drug abuse, alcoholism, illness, and children with mutilated fate. The conducted research of the described situation led us to discover rigid logic-information restrictions. These restrictions result in the impossibility of correct inter-human understanding and in crises.

In the talk we will formulate a certain hidden logic-information psycho-linguistic phenomenon in human personality in terms of information systems and in terms of transpersonal psychology. This phenomenon seems to be very impor-

tant. However, most of well known philosophical, psychological, ethical schools, theories, methodologies do not take into account this most important phenomenon because they are unaware of it. Seemingly, this is why some of them are temporary and ineffective.

The essence of this phenomenon lies in a deeply hidden contradiction between the multiplicity of psychodynamic structures of the human personality and their mono-addressed form. This contradiction turns out to be psycho-traumatic. In terms of the settled notions of transpersonal psychology, the nature of the pointed phenomenon is in the following: In the adopted human communication system, the sub-personalities of one personality interact with the sub-personalities of another personality (entirely or mainly) through the kernels of their personalities, addressing their common informational address "YOU". This system operates through the kernels ("nucleus") of personalities and is therefore called NUCLESOL. (The name "nuclear" for the existing human communication system seems to be even more appropriate because after mutual informational-emotional blows [INFEMBLOWS], aimed at the kernels of each other in conflict circumstances, the psychodynamic centers of people are damaged fatally no less than in the actual nuclear conflicts). This system (NUCLESOL) traumatizes people from the childhood throughout their entire lives and has the following main defects. (Here «SOL» means «system of human communication» in Russian or approximately «system of language» in English).

1. Every "central statement", that is a statement beginning with pronoun "YOU" (in any declination), is clearly aimed at the central human psychodynamic structure. In view of the pointed contradiction, it can be true for some psychodynamic structures but can be false for others. Therefore, such central statement cannot be true at the same time for the whole unifying psychodynamic structure. But every central statement is aimed at it. The existing NUCLESOL system is therefore inculcating lies in the messages (independently of people's intentions) and is psycho-traumatic. This is especially traumatic for children.

2. Due to the described phenomenon the existing NUCLESOL system adopts external INFEMBLOWS in the form of central statements, i.e. the statements beginning with pronoun "YOU". Especially harmful are critical central statements, i.e. remarks, accusations, orders etc. Most of the existing complex responsible information systems are equipped with multilevel security protection against unauthorized access to their vital kernels. Contrary to this, people (and especially children) do not naturally have such security structures. This is why every unauthorized invasion of external INFEMBLOWS in the form of central statements is psycho-traumatic for the personality. An unauthorized "hacking" breaking in another soul is characteristic for our civilization with all negative consequences for people and for the society. There are a lot of sophisticated and not so sophisticated lovers of such breaking-ins.

3. Thus, the existing communication system operates through the kernels of personalities. It is especially cruel and psycho-traumatic towards children because they do not have any internal protecting structures by nature and have not yet acquired them through experience. Many of informational-emotional blows

contain lies and children do not have any protection against such blows from adults.

In our presentation we will formulate the foundation of the alternative human communication system, which we call ALTERSOL. In fact, this system is natural, but slumbering in people. The ALTERSOL system is practically free from the main defects of the existing communication system. We think that sooner or later the mankind will mature to legally protect the right of a man (and especially a child) to the inviolability of his/her soul from the unauthorized invasion by informational-emotional blows from other people. Such right is easily and naturally achieved by adopting the ALTERSOL system. Every man should have a right to choose a more humane than NUCLESOL communication system (for example ALTERSOL) in response to a communication proposal by another person. This seems to be a necessary value of the third millennium.

Communication in the form of INFEMBLOWS is inevitable in the real life. An alternative ALTERSOL system is designed to protect the human personality from its negative influence, at the same time preserving the contents and emotional information of the communication. It protects adults and children from psycho-traumatic influence of INFEMBLOWS. The ALTERSOL system is possible because it uses peripheral informational human psychodynamic structures to readdress the communication to them and to go round the central structure. The effect of such protection in three described aspects turned out to be strikingly high. This is because the sensibility of these structures (private “presidential” advisors) is in hundreds, if not thousands, times lower than the sensibility of the kernel. The idea of ALTERSOL is in the communication entirely (or mainly) by “non-central” statements. This means that instead of beginning with pronoun “YOU”, the phrases should begin with pronoun “YOUR”, followed by words like temper, habit, manner, taste, voice, deputy for something etc., dependent on the meaning. One of the main features of the ALTERSOL system is that it prevents the critical (remarks, insults, etc.) and other (challenging the watchfulness etc.) statements to reach the central psychodynamic structure, which is addressed by using pronoun “YOU”. It redirects all statements to non-central psychodynamic structures by using pronoun “YOUR”. The sensibility of the latter non-central structures is lower than that of the central system.

Obviously, from the medical point of view, the ALTERSOL system is a “method of prevention and treatment of psychological traumas and their consequences, which are the cause of stresses and illnesses or are their inevitable elements”. The ALTERSOL system serves to eliminate the described above phenomenon and its consequences in people and in the society. The technology “CAPCS” (or Client-Addressed-Protection-Control-System) was created and successfully tested. Its first stage “RITA” (or Remarks-In-Third-Address) consists of the activation of the alternative system and tests were devoted to the optimal choice of “addresses” of sub-personalities. This allows going round the kernel of the personality more effectively. In fact, the sub-personalities can be regarded as clients of the kernel.

Remarkably, many religious and human values can be interpreted in terms of this alternative system:

1. Every critical nuclear informational-emotional blow from one person to another is the TRIAL of one personality by another. This is because a critical INFEMBLOW always contains remarks, insults, accusations, or threats. A man in ALTERSOL (contrary to NUCLESOL) is organically unable to inflict a nuclear INFEMBLOW. A man in ALTERSOL never JUDGES the others. In these conditions the biblical wisdom “DO NOT JUDGE AND YOU WILL NOT BE JUDGED” is easily achieved without heroic overcoming of artificially created obstacles.

2. People living in ALTERSOL do not inflict nuclear INFEMBLOWS to each other. As a result, they have much less dissatisfaction by each other, anger, and offences, created in NUCLESOL. Therefore, it is much easier and more natural for them to follow another biblical wisdom “LOVE YOUR NEIGHBOUR AS YOU LOVE YOURSELF”.

3. In ALTERSOL it is also easy and natural (contrary to NUCLESOL) to follow another important biblical wisdom, “TO THOSE HITTING YOU ON ONE CHEEK HOLD UP ANOTHER”. This is explained by the fact that an insult or an INFEMBLOW, aimed at a guilty sub-personality, does not affect the kernel and other sub-personalities. Therefore, it does not usually cause an offensive reaction or a counter attack. On the contrary, it is supported by the personality.

4. If a follower of NUCLESOL is aware of the defects of this system and is aware of the existence of ALTERSOL without these defects, then he/she must understand that he/she is automatically not among those to whom the biblical wisdom “EXCUSE THEM, GOD, FOR THEY DO NOT KNOW WHAT THEY ARE DOING” applies.
